Solvilla Bio, Natural fruits from our land!

We are producers of organic oranges grown following a process of cultivation, harvesting and production 100% traditional, which gives our fruit an excellent flavor and quality.

Our fruit is grown in the garden of Europa (Andalusia) using organic farming methods to obtain fresh, natural fruit with the best flavour direct from the farmer". At Solvilla Bio we focus on following the natural flavour of the fruit, leaving the soil to do its job and we only achieve this by giving the best natural care, always taking care of the natural environment and its flora and fauna.

With harvesting fields of more than 150 hectares and a production of approximately 7,000 tons per season, we are proud to export a premium quality product from Seville to the world.

At Solvilla Bio we work with daily effort and the aim of satisfying our customers, giving our best every day to bring our fruit from the orchard to the consumer's table with all the freshness of freshly picked fruit.

CERTIFICATIONS

In Solvilla Bio we are certified by GLOBAL GAP, GRASP, BRC FOOD, and IFS FOOD that endorse our good practices in the harvesting and production processes as well as in our business.

To support our ecological farming practices, we are endorsed by CAAE, which is one of the most important certifying bodies in the sector and with the most experience in certifying ecological activities in Spain.
